Pool safety...

there is another approach
find out more

SenTAG

SenTAG

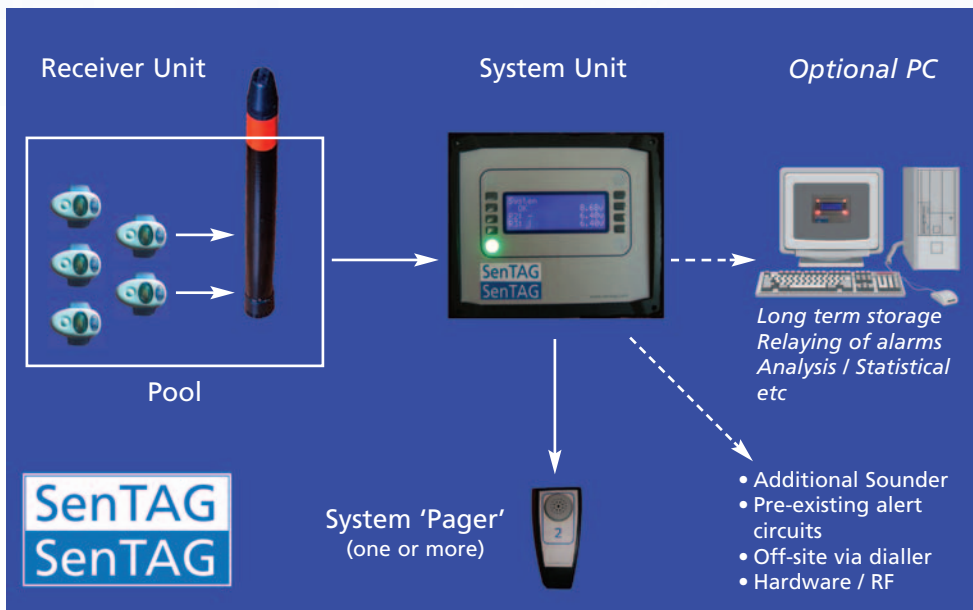

SenTAG is the new way to provide superior safety coverage for bathers. Wristbands continually monitor the status of the wearer by looking at motion, depth and time. If rule thresholds are exceeded a wireless signal is transmitted through the pool water to an analyser / receiver – alerting the first responder or pool supervisor to investigate. It's that simple.

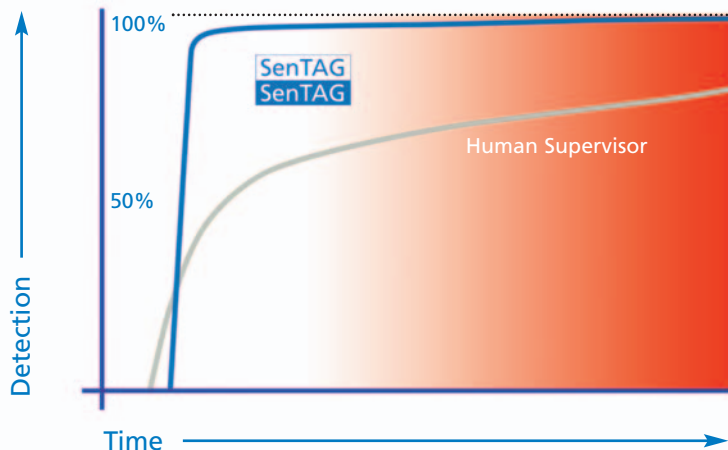

SenTAG systems can be installed without disruption, complex cabling or building work in a single day even at existing facilities and it is intuitive for both bathers and operator staff to use. All pool hall elements are battery or low voltage powered and networked by radio.

Suitable for both supervised sessions as key back up to poolside supervision and for operations where first responders are not continually at poolside. The system quickly identifies situations that need human assessment.

Most serious incidents involve pool staff becoming aware too late. **SenTAG** fills that time gap with vital alerts to supervisory staff. **SenTAG** does not necessarily replace supervisory staff and highlights the vast majority of incidents early. It is a powerful aid that saves critical time. Early alerting saves lives and prevents lasting injuries resulting from 'near drowning'.

The Worlds most capable auto-detect system

Is it cost-effective?

Small and large operators alike can easily justify **SenTAG**. We or our distributors can provide a turn-key service of equipment supply, installation, and training from about £ 9,000 per pool. Alternatively systems can be installed under a leasing agreement that includes periodic software upgrades and maintenance. These can cost from as little as £2 per hour of use – a modest commitment relative to the transformation a **SenTAG** system can have on overall safety or risk reduction.

MAJOR RISK REDUCTION and LOW COST

Suitable for what size of pools?

The system is highly modular. Additional wristbands, receivers and wall units can be added to accommodate any size of pool or complex. At the other end of the scale small hotel type pools can simply use what is needed.

FLEXIBLE ARCHITECTURE & FULLY SCALABLE

What next?

Contact us. Tell us about your safety issues and we will advise you how **SenTAG** could assist. The system was developed with input from practically minded leisure operators to address real world safety issues.

WHY RISK NOT KNOWING MORE ABOUT SenTAG?

Contact Information

The best way to find out more about **SenTAG** is via our website – www.sentag.com – you can leave your contact details and any queries here and we will contact you.

Demonstrations

We believe that the best way to understand the full capabilities of **SenTAG** is to see it in action.

SenTAG will run practical demonstrations for interested organisations throughout the UK and beyond. These can be held at either existing installations or at virtually any other pool. Portable demonstration equipment is battery powered and can be set up in less than 15 minutes at your site or local to you.

To see and understand the benefits of **SenTAG**, or to find out more about our seminar programme, contact us via the enquiry form at www.sentag.com or email mpl@sentag.com
Alternatively telephone us on **+44 (0)1635 200167**

Trials

A small number of 'no obligation' 28 day trial installations are offered in some market segments. Please contact us for details.

The difference between a minor pool incident and a serious one is time... just a minute or so
