Spica Mobile Time

Manage your time and attendance anywhere, anytime

Spica Mobile Time (SMT) is a mobile app (Android, iOS) for Time&Space users that enables worktime and approval management via their smartphone or tablet.

FOR EMPLOYEES

Clocking anytime, anywhere

Spica Mobile Time provides information on employee's personal time and attendance data and is accessible anytime. Employees can review daily and weekly information, clocking details, daily balances and vacation quotas for selected dates. All information is displayed clearly, graphically and intuitively.

Clock arrival, departure or other events via mobile even without internet connection

Submit requests for absences and leaves without paperwork

Track pending, denied and approved requests

See the balance of hours, spent and remaining vacation days

View quick reports and charts reports

The overview of your employees' attendance at hand

Spica Mobile Time is a perfect solution to manage the employees on the go. Managers can access real-time data about who is present, who is absent, and receive daily and weekly reports on the staff they are responsible for. Using Spica Mobile Time, reviewing and responding to leave and other absence requests is much easier and more convenient. Managers have several reports available at hand: violations, visual weekly overview and calculated totals.

Review real-time data on absences and violations

Quickly respond to employee requests

Quickly spot anomalies

Access the history of employee clocking, location, and detailed reports

Android and iOS compatible.

Supports NFC technology.
